

SURGICAL INSTRUMENTS

MANUFACTURED AND SOLD BY
ARNOLD AND SONS,

INSTRUMFT MAFRS BY APPOINTMENT TO

Her Majesty's Government; St. Bartholomew's Hospital, The
Great Northern Hospital; The Royal Veterinary
College; The Seamen's Hospital, &c.

35 & 36, WEST SMITHFIELD, LONDON.

1873

Entered at Stationers' Hall

PREFACE.

ARNOLD AND SONS in presenting to the Profession the New Edition of their Illustrated Catalogue of Surgical Instruments and appliances, take the opportunity of tendering their thanks for the liberal support they have received during the last sixty years, and trust that by still continuing to produce Instruments, &c., of the very best construction, quality and finish, to merit a continuance of that patronage hitherto accorded them.

All Instruments are manufactured on the premises under Arnold and Sons' *personal* superintendence, thus enabling them to *guarantee* the quality of every article purchased.

The prices affixed are extremely moderate taking into account the superior workmanship, and will bear a favourable comparison with other published lists; if, in some few cases they be slightly in excess, it is because it is found to be impossible to produce Instruments at a lower rate, if the quality be *guaranteed*.

Arnold and Sons have for some years made Orthopædic Instruments their *spécialité*, and have devoted considerable time and attention to the production of appliances, remarkable not only for their effective ingenuity, but also for their extreme lightness, the latter quality being so highly essential in all cases requiring mechanical assistance.

Orders from abroad must either be accompanied by a

remittance or an order for payment in London, and Arnold and Sons request that, when orders are sent through an agent, it be distinctly stated that the Instruments are to be obtained *direct* from them, as many articles of inferior quality are frequently represented as their manufacture.

Every instrument is stamped "Arnold and Sons, London."

Arnold and Sons, for the convenience of their friends, have made special arrangements with the various firms mentioned at the end of catalogue to supply articles at manufacturers' prices ; and any goods not enumerated in this Catalogue required by customers abroad will be procured for them, on advantageous terms, a commission of five per cent. on the amount expended being the sole charge.

Satisfactory London references required previous to opening new accounts. Cheques to be crossed Bank of England, and Post-Office Orders to be made payable at Chief Office.

35 & 36, WEST SMITHFIELD,

LONDON, E.C.

January, 1873.

T N D E X

Abdominal Paracentesis Trocars ..	103	Army Regulation Cases 5-7
Abdominal Belts, Bandages, &c. ..	105-107	Do. Splints 120
Arnethy's Ear Syringes ..	168	Arnold's Artery Forceps

ARNOLD & SONS have the pleasure to inform the Medical Profession of Western India that special arrangements have been made with Messrs. D. Kemp & Co., Bombay, to supply Surgical Instruments and Appliances of Arnold & Sons' Manufacture, upon the most advantageous terms.

35 & 36, West Smithfield,
London, January 1, 1873.

INDEX.

Flexible Conversation Tules	107	Forbeps, Vulscellum	81, 103
Do. Uterine Stems	161	Do. Wathen's Starch Bandage	189
Fluid Dilators, Ashton's	139	Do. Webber's Anti-ligature	17
Do. Urethral Dilators	158	Do. Wild's Far	166
Folder's Powder	190	Fracture Splints, Liston's	120
Folding Director and Anemisine Needle	201	Do. Cradles	121, 122
Foreign Body Scoop, Walton's	57	French Crutches	118
Forceps, Artery	17-19	Do. Shears (Starch Bandages)	189
Do. Assilini's Artery	18	Fetal Heads	185
Do. Avery's Ear	106	Do. Skeletons	185
Do. Bar Clamp	163	Fountain Enemas	145
Do. Bar, Curved	163	Fox's Cupping Glasses	64
Do. Bone	172	Do. Tooth Keys	100
Do. Bow, or Dressing	41	Fractured Jaw Instruments	83
Do. Bullet	18	Frenum Scissors	34
Do. Capsular	51	Iron Plates for Microscopes	183
Do. Cilia	51	Funis Instrument, Robertson's	34
Do. Clitoridectomy	163		
Do. Craniotomy	31-33	Gag, Mouth Props, &c.	83, 137
Do. Cross-action	54	Gaillie's Medical Batteries	177
Do. Mathieu's Cross-action	161	Gair'skell's Obstetric Bandages	107
Do. Desmarre's	54	Galvanic Machines	173
Do. Ditschenbach's Artery	18	Do. Uterine Stems	160
Do. Dissecting	50	Gas Apparatus for Nitrous Oxide	135
Do. Dressing	44	Do. Compressed Nitrous Oxide	137
Do. Ear	165	Gasometer (Nitrous Oxide)	137
Do. Entomological	186	Gasometer Tubing	137
Do. Entropium	54	Gentlemen's Chest Expanders	138
Do. Hemorrhoidal	140	German Hypodermic Syringes	126
Do. Hoffman's Gouge	172	Gibbs' Syringes	79
Do. Improved Speculum	162	Glascher's Rain Gauges	156
Do. Iris	54	Glass Hydrometers	153
Do. Liston's Artery	17	Do. Microscopic	183
Do. Lithotomy, Cross-action	61	Do. Nipple Shells	35
Do. do. Curved	61	Do. Nipple Shields	35
Do. do. Thompson's	61	Do. Plates	182
Do. Luer's Artery	17	Do. Slides	183
Do. Luer's Gouge	172	Do. Slips	1-3
Do. Macintosh's Ovum	158	Do. Syringes	172
Do. Marshall's	140	Do. Urinals	125
Do. Midwifery	24-30	Do. Urinometers	170
Do. Necrosis	172	Glasses, Breast	138
Do. Needle-holding	163	Do. Cupping	64
Do. Onychia	190	Gloves, Post-mortem	50
Do. Ovum	34	Goddard's Carbolic Acid Diffusers	180
Do. Placenta	34	Godson's Craniotomy Forceps	32
Do. Polypus	168	Do. Midwifery Forceps	28
Do. Ricord's	112	Do. Membrane Perforators	34
Do. Schuft's	57	Do. Tent Inducers	160
Do. Simpson's Ovum	158	Gold Size	183
Do. Skull	172	Gooch's Silver Canulas	163
Do. Speculum	102	Gorgets, Blunt	59
Do. Sponge	158	Gouge, Cutting	59

sides or flaps, with loops for lithotrites, catheters, &c. The 'bag contains—(1) A case containing two amputating knives, butcher's amputating saw, and catlin. (2) A case containing three scalpels, two curved bistouries, a hernia knife, two lithotomy knives, two harelip or tenotomy knives, probe, sharp-pointed pair of scissors, pair of artery forceps or tenaculum, pair of spring forceps, aneurism, needle, double hook, and hernia director. (3) A case containing three cataract knives, Tyrrell's hook, four needles, silver curette and hook, Adams' eyelid retractor, set of Bowman's probes, Critchett's fine groove director, pair of cilia forceps, pair of iris forceps, and two pairs of scissors. (4) Case containing complete set of Holt's dilators. (5) Tonsil guillotine in case. (6) Ophthalmoscope and laryngoscope combined in case. (7) A pocket case containing gum lancet, Syme's knife, finger knife, scalpel, dressing forceps, pair of scissors, silver caustic case, silver female catheter, probe, director, needles, exploring trocar, &c. (8) A case containing hydrocele trocar, trocar for paracentesis, half-ounce glass syringe with platinum point, and small bottle. (9) A case containing gum elastic catheters, Holt's india-rubber winged catheters, folding needle-case. (10) A case for hare-lip pins, acupressure needles, probes, &c. (11) A hypodermic syringe in case. (12) Small chloroform bottle in wood case. On the two sides of the bag:—

Two lithotrites, silver double channel catheter; three short-beaked sounds, prostate catheter, five silver catheters (Nos. 1, 2, 3, 8, and 10), Ponteau's curved trocar for puncturing the bladder, folding rectum speculum, vagina speculum, probang, clinical thermometer, polypus forceps, epistaxis catheter, Arnold's eraser, tooth forceps, tracheotomy tubes, rectum bougies, lithotomy forceps, lithotomy scoops, lithotomy staffs, tourniquet, &c.

Fig. 1 represents the Bag when open.

Fig. 2, the Bag (Morocco) when closed, size $18 \times 5\frac{1}{4} \times 9\frac{1}{2}$.
Complete with instruments as above 50 guineas.
Bag and wire trays (without instruments) 3 guineas.

The instruments can be varied to suit the requirements of the surgeon.

Extract from the *Lancet*, April 22nd, 1871:—"The Bag is perfectly portable, and is of a size not to offend the eye, or be inconvenient to carry. In this *multum in parvo* there is almost everything that can be required in military or civil practice."

Extract from *Medical Times and Gazette*, May 13th
if he desires to take with him merely some ill shoulders. •

---------------------------------	---------

Mr. Bernard Holt writes:—“For some years I have felt the desirability of possessing a convenient Surgical Bag, capable of containing not only instruments required for any surgical emergency, but also those that are in daily use. The difficulty hitherto has been of two kinds,—namely, the size of the bag and the facility of readily finding the instruments you require. Dr. Greenhalgh has fitted one of Arnold & Sons’ Registered Bags for obstetric purposes, and I have, after some thought, suggested to Mr. James Arnold, of West Smithfield, who is the inventor of the Bag, an interior arrangement by which every instrument can be immediately selected without disturbing the rest.”

AMPUTATING INSTRUMENTS.

FIG. 3.

Morocco case, containing—

Large Fergusson’s Amputating Knife.

Medium ditto ditto.

Small ditto ditto.

The case as above £1 10 0

ARMY REGULATION CASE.

FIG. 1

In accordance with the Army Regulations

A superior handsome Mahogany brass-bound case, lined with silk velvet, containing—

Four Amputating Knives
Best Large Amputating Saw

- Butcher's Amputating Saw, for excisions.
 Liston's Bone Forceps.
 Syme's Artery Forceps and Liston's Artery Forceps.
 Four Pairs Dieffenbach's Artery Forceps.
 Two Trephines, small and medium.
 Elevators, square-pointed.
 Strong Straight Scissors.
 Hey's Skull Saw and Raspitory.
 Straight Gouge and Gouge Forceps.
 Pair Necrosis Forceps.
 Fergusson's Clawed or Lion Forceps.
 Pair Dissecting or Spring Forceps
 Six Operating Scalpels, Strong scale-tanged Scalpel.
 Two Curved Bistouries, one each probe and sharp-pointed.
 Three Straight Bistouries, two sharp and one probe-pointed.
 Tenaculum and Aneurism Needle.
 Hernia Knife or Bistouri.
 Hernia Director and Silver Director.
 Large Trocar and Canula for Paracentesis Abdominis.
 Hydrocele Trocar and Silver Canula.
 Hydrocele Syringe, with palladium point.
 Small Exploring Trocar, with Silver Canula.
 Liston's Navi Needle.
 Improved Bullet Forceps, with moveable blades.
 Bullet Extractor.
 Two Silver Trachea-Tubes and Canulas.
 Long Silver Gun-shot Probe.
 Four elastic gum web Male Catheters, Nos. 1, 3, 5, 7.
 Three Silver Male Catheters, hall-marked, Nos. 2, 4, and 6
 Silver Female Catheter, hall-marked.
 Set of Bowman's Probes, and Critchett's Director in case.
 Ancel's Lachrymal Probe, and Two Silver Styles.
 Cataract Needle, and Walton's Scoop in case.
 Tenotomy Knife.
 Denman's short Midwifery Forceps.
 Two Tourniquets, one each spiral and field.
 Jointed Probang for thrusting and extracting.
 Twelve Suture Needles, half-curved.
 Two Reels Ligature Silk, and one Reel Silver Wire.
 Pair Pin-cutting Forceps or Pliers.
 Tin Case for Icinglass and Plaster.
 Screw Cap Bottle, Two Reels Thread, and Wax.

In chequered ebony handles, the case complete as above £24 15 0

ARNOLD AND SONS, LONDON.

ARMY REGULATION CASE.

A superior Mahogany case, brass-bound and lined with silk velv containing—

- Small Liston's Amputating Knife for the flap operation.
Medium ditto ditto ditto.
Large Liston's Amputating Knife ditto.
Large Amputating Saw.
Amputating Saw with shifting back.
Three Operating Scalpels.
Straight Bistouri.
Two Curved Bistouries, sharp and probe-pointed.
Hernia Knife.
Liston's Bone Forceps, circular joints.
Improved Bullet Forceps, with shifting blade.
Two Dieffenbach's Artery Forceps.
Pair Dissecting Forceps
Liston's or Luer's Artery Forceps
Liston's Needle with handle.
Aneurism Needle.
Silver Double Trachea-Tube.
Four elastic gum web Catheters, Nos. 1, 4, 7, and 9.
Three Silver Catheters, Nos. 3, 5, and 8 (hall-marked)

- Pocket case of Instruments
- Case of Tooth Instruments.
- Four Silver Catheters, 2, 4, 6, and 8, hall-marked.
- Silver Female Catheter, hall-marked.
- Four elastic gum web Catheters
- Midwifery Instruments in case, containing Midwifery Forceps, Perforator, Cianiotomy Forceps, Blunt Hook, and Crotchet.
- Four Bleeding Lancets, in case.
- Elevator.
- Trachæotomy Tube.
- Trephine and Trephine Brush.

The set of Instruments as enumerated above £19 19 0

DR. ANGOVE'S ACCIDENT CASE.

Extract from the *Lancet*, May 21st, 1870.

'Sir,—The accompanying description of my accident case will be found useful I think, by those of my fellow-practitioners who do the greater part of their work on or seafarers. The advantages are that it will contain instruments enough for almost any accident, together with lint, plaster, bandages, tourniquet &c; and by

keeping this stocked and hung up in a handy place, you are ready to be off at any moment. It is easily carried on horseback. By taking the instruments, &c., out you have an oblong box, in which you can put what you like, the instruments, being only kept in by a leather strap and an elastic band, which do not take up any room in case.

"In a mining practice one rarely if ever knows the nature of the accident he is called to, I therefore find it valuable, being 'with my case ready for the small cut or anything else, including an amputation.'

"Messrs Arnold and Sons of 35 West Smithfield make mine for me—they keep them in stock empty or will fill them according to order. The cases are made of hard leather, will stand any amount of knocking about and cost a very small sum."

"I am, Sir, your obedient servant,
‘I ‘ T A M O R E A N G O V E

'Ivy House, Camborne Cornwall March 1870'

FIG. 9

Dr Angove's Accident Case, dimensions $11 \times 4\frac{1}{2} \times 3$, as fig. 9 containing—

- Amputating Saw, large
- Bullet Forceps, improved, with shifting blades
- Amputating Knife, in chequered ebony handle
- Cathin ditto
- Finger Saw ditto
- Scalpel operating
- Bone Forceps, circular joints
- Artery Forceps, Lucr's or Laston's
- Pair strong Scissors
- Two Silver Probes
- Needles and Suture Silk.

Complete with Instruments as above	£	4	1	0

ARNOLD AND SONS' IMPROVED SILK possesses the following advantages.—Pure silk, free from all dressing or colouring matter, and will not kink or curl under any circumstances, immense strength, being plaited, will tie securely without untwisting.

Extract from the *Lancet*, October 15th, 1870, page 556:—“We have been supplied with a specimen of this cord, which appears to us to be very good.”

British Medical Journal, October 8th, 1870, page 393:—Its recommendations are, that it does not twist or curl when used, like ordinary silk.”

Medical Times and Gazette, October 15th, 1870, page 465:—“It is of a plaited texture, very strong, and is free from all dressing or colouring matter.”

Medical Press and Circular, October 12th, 1870, page 300:—“We have seen a sample of this substance, made by Messrs. Arnold and Sons, and can strongly recommend it. We hope some of it may be sent out to the French at the seat of war.”

**ARNOLD AND SON'S REGISTERED
OBSTETRIC BAG.**

AS SUGGESTED BY DR. GREENHALGH.

FIG. 21

Fig. 21 showing the Bag open. Fig. 22 the Bag closed. The Bag contains Dr. Greenhalgh's Midwifery Forceps, Improved Double Action Perforator, Craniotomy Forceps, Lazarovitch's Blunt Hook and Tape, Crotchet with Cross Handle, Pair of Flanum Scissors, Female Catheter, Skinner's Chloroform Inhaler, Chloroform Drop Bottle, Uterine Syringo and Enema, Dr. Richardson's Spray Apparatus, and Stoppered Bottles for Ergot, Tincture of Opium, Compound Spirits of Ammonia, Anaesthetic Ether, Chloroform, Brandy, &c., &c

Extract from the *Lancet*, March 26th, 1870 — "We have carefully inspected one of these bags, and consider them a decided success."

British Medical Journal, April 23rd, 1870 — "The obstetrician and general practitioner will find it in truth a *multum in parvo*. At first sight eight pounds may appear a heavy price to pay for the luxury of such a bag, but its fittings are of the very best quality and workmanship."

I, on almost *Medical Times and Gazette*, April 9th, 1870.—"Messrs Arnold and Sons have invented an Obstetric Bag, which certainly is as near perfection as anything we have seen."

1 *Medical Press and Circular*, April 13th, 1870:—"The Obstetric Bag is admirably arranged, and we offer the maker our congratulations."

Medical Mirror, September, 1st, 1870 :—“Practitioners who delight in elegances will find this Bag designed with good taste, while it is furnished with instruments as good in quality and as finished in workmanship as they could wish.”

Dr. Tanner's Manual of Midwifery :—“An Obstetric Bag has recently been introduced to the notice of obstetricians by Messrs. Arnold and Sons, of West Smithfield, and from personal experience the author can conscientiously and confidently recommend its use to his professional brethren”

---	---	---	---

Ligature Silk, Arnold and Sons' improved, possesses the following advantages over all existing silks hitherto manufactured. Pure silk and free from all dressing or colouring matter, will not kink or curl under any circumstances, immense strength, and being plaited, will tie securely without untwisting.

Tablet, with four assorted sizes of silk wound thereon, in neat paper case complete	0	1	6
---	---	---	---

I extract from the *Medical Journal*, October 10th, 1870, page 506 — "We have been supplied with a specimen of this cord, which appears to us to be very good."

* *Medical Journal*, October 8th 1870, page 393 — "Its recommendation is that it does not twist or curl when used like the ordinary silk."

Medical Times and Gazette, October 15th, 1870, page 46 — "It is of a plaited texture, very strong, and is free from all dressing or colouring matter."

Medical Press and Circular, October 12th, 1870, page 300 — "We have seen a sample of this substance, made by Messrs Arnold and Sons, and can strongly recommend it. We hope some of it may be cut out to the French at the seat of war."

LITHOTOMY AND LITHOTRITY
INSTRUMENTS.

Mahogany case, brass bound and lined silk velvet, containing—

- Three Steel Thompson's Sounds.
- One Female ditto.
- Four Staffs.
- Two pairs Liston's Forceps.
- One ditto curved.
- Two Liston's Knives.
- Two Scoops.
- Two Elastic Gum Tubes
- Two Web Bandages.

The above, complete £6 15 0

Super Mahogany case, brass bound and lined silk velvet, containing—

- Three Sir H. Thompson's straight Forceps
- One ditto ditto curved.
- Three Liston's Knives.
- One Sir H. Thompson's Knife.
- Four Steel Sounds, Male.
- One ditto Female.
- Four Lateral Staffs.
- Three Median ditto.
- Two Hollow Sounds, plated.
- Two Scoops
- One Clover's ditto bent.
- Three Silver-mounted Elastic Gum Tubes.
- One Searcher.
- Syringe and Stop-cock, with Sir H. Thompson's Ball Nozzle
for the Bladder.
- Pinchard's Leather Cuffs and Anklets.

The case as above £13 15 0

Case of Lithotritry Instruments, brass bound and lined silk velvet,
containing—

- Sir H. Thompson's Lithotrite.
- Lithotrite, with Flat Blade (for debris)

Lithotrite, with flat Blade (for debris), for Children
 Forceps for removing fragments
 Silver Catheter, Hall marked
 Brass Syringe for ditto

The above complete .

Dr. Greenhalgh's Elastic spring Pessary, with two India rubber transverse bands, Fig. 115	0 2 6
Ditto ditto with four ditto	0 3 0
Ditto ditto with six ditto Fig. 116	0 3 6

Extract from *British Medical Journal*, May 2nd, 1868 — They are easier of introduction and removal than Hodge's Pessary, and can be more easily adjusted, occasions little or no inconvenience.

Arnold and Sons, having originally made these Pessaries specially for Dr Greenhalgh, caution the Profession against many sold and represented as their manufacture, which are different in shape, construction, and material, and, consequently, useless for the purpose intended.

Inventor in the *Medical Times and Gazette*, January 20th 1872 — The main spring is attached to the framework of the instrument by a hinge joint, which permits free radial but no lateral movement. If the extremity, which is covered by an ivory pad, rests upon the artery (usually the radial) from which it is proposed to obtain a pulse, to this spring is attached a block which forms the centre of movement for a lever of the third order, which encloses it by the bifurcation of its extremity, a pin projecting from either side of the block, and passing through each extremity of the bifurcation, thus insuring a perfect radial movement free from lateral oscillations.

Kempner's Improved Artificial Leg, for amputation above knee	.	.	10 10 0
Ditto ditto ditto second quality	.	.	12 12 0
Ditto ditto ditto superior quality	.	.	17 17 0

Measurements required for amputation above knee length from crutch to end of stump, circumference round end, middle, and top of stump (close to crutch), the length of sound limb from crutch to centre of knee, centre of knee to ground, height from top of knee, when bent, to the ground State if right or left, the boot to be worn is required.

I extract from the *Bethlem Medical Journal* January 14 1871 — “Mr Kempner has devised an ingenious form of Artificial Leg it is made of leather, with hinges, and is extremely light Mr Kempner has himself lost his leg and necessity has been with him the mother of invention He has taken great pains to discover the exact position at which the hinges should be placed to secure easy motion, and how the problem of combining lightness with strength might be best solved We have seen him walk, stand, &c, and he does so with remarkable ease and quickness, and we strongly recommend a trial of it to all who need such help”

“29, Seymour St, W
“Mr Kempner has fitted an Artificial Leg to a patient whose leg I amputated at the knee joint, and the result has certainly been most satisfactory as I saw the patient walk with ease, unsupported by stick or crutch, a week after he had first used the leg The principle of Mr Kempner's Artificial Leg is simple and the instrument is strong and durable, without being heavy

(Signed) “CAMILLI DE MORGAN, F R S
“1st December, 1870” “Surgeon to the Middlesex Hospital”

Messrs Arnold and Sons have purchased the exclusive right to manufacture the Improved form of Artificial Leg invented by Mr Kempner, and have made special arrangements with him to superintend the manufacture thereof

Artificial Arm, with hook, ring, knife, or fork, for amputation below elbow £1 15 0

11^c 290

			£	s	d
Artificial Arm below elbow, with Hand attached, Fig. 290			8	10	0
Ditto	ditto	best quality	10	10	0

Measurements required for amputation below elbow length from elbow to end of stump, circumference above, round, and below elbow, circumference round end of stump, length of sound arm, elbow to wrist, and if right or left When a hand is required a glove should be sent, and the outline of hand traced on paper.

Cocking's Patent Poroplastic Sheet for Splints			

"It is light, porous, flexible, plastic, and economical—is made in all required strengths and sizes. It consists of a felted substance in sheets, is plastic when softened by heat, and becomes rigid when cold, and can be re-softened any number of times without injury, it is rapidly and easily cut to any shape and manipulated, the most difficult splint requiring but a few minutes to complete—is very well adapted for separate metal attachments, and is thus a very valuable material for interrupted splints. There is no glue used in its application, and the gums with which it is stiffened are quite harmless"—Vide *Lancet*, September 16, 1871, *British Medical Journal*, September 23, 1871, *Medical Press and Circular*, September 27, 1871.

FIG. 333.

Bloxam's Improved Graduated Chloroform Drop Bottle, in leather case, size 4 $\frac{1}{2}$ in. + 1 $\frac{1}{4}$ in., Fig. 333	0	3	6
Ditto, in boxwood case	0	4	6

Vide *British Medical Journal*, March 11th, 1871, the *Lancet*, March 18th, 1871, *Medical Times and Gazette*, February 4th and 25th, 1871, *Medical Press and Circular*, March 22nd, 1871.

The Graduated Chloroform Bottle is exceedingly portable and simple. No assistant is required in the administration. The chloroform being spread over a large surface of lint, the amount of atmospheric air is very great. It is much safer, as you do not rely upon complicated valves. The amount of chloroform administered can at once be ascertained by the graduated scale.

SPRAY PRODUCERS.

FIG. 334.

		£ s. d.
Richardson's Ether Spray Apparatus, with Hand Ball, graduated stoppered Bottle, complete in mahogany case, single jet, Fig. 334		0 15 6

NITROUS OXIDE GAS APPARATUS.

Nitrous Oxide Gas is strongly recommended for its *safety*, rapidity of action, and the absence of any disagreeable after effects.

FIG. 335.

Barth's Portable Apparatus, consisting of a copper vessel £ s. d.
containing 20 gallons of compressed gas, Catlin's
bag and union, Clover's face-piece, and two-way stop-
cock, in mahogany case, Fig. 335 4 10 0

FIG. 336.

No. 1 apparatus, consisting of Barth's Patent Economizer, as
used at St. Bartholomew's, the Dental Hospital, &c.,
&c., Fig. 336 5 5 0

Forty-five gallon bottle of pure compressed gas for ditto	2	2	0
Clover's face-piece and two-way stopcock for ditto	1	11	6
	<hr/>		
	£	8	18
	18	6	

This is the most perfect apparatus; it is especially recommended to dentists of large practice, as it effects a great saving in the amount of gas used.

No. 2 apparatus, complete. Large-sized Catlin's bag and union for bottle	0	18	0
Clover's face-piece and two-way-stop cock	1	11	6
Strong copper Cylinder, 10 in. by 6 in., containing 20 gallons of pure compressed gas	1	10	0
Mahogany case	0	10	0
	<hr/>		
	4	10	0

Deal case for extra Bottle 0 1 6

This apparatus is complete in itself, and special attention is desired to the perfect safety as well as portability of the copper vessel containing the gas.

£ s. d.

Clover's apparatus, consisting of one face piece, supplemental bag, and stopcock, two-way stopcock, Catlin's bag and union, and 100-gallon vessel of gas, complete in case	7 0 0
Ditto ditto with two face-pieces	8 1 0
Ditto ditto three "	9 7 6
Arnold and Sons' Portable Nitrous Oxide Bag, containing 25-gallon bottle liquid gas, Mr. Bloxam's bag and union, with two way stopcock face-piece, &c., complete	4 10 0

FIG. 337.

Arnold and Sons' Nitrous Oxide Bag Registered, containing 25-gallon bottle of liquid gas, with Mr. Coleman's Improved Economizer, Mr. Bloxam's bag and union, two-way stopcock, and Brain's face-piece, complete, Fig. 337 6

Edward's Patent Economizing Inhaler and Gas holder, complete, Fig. 338 3 5 0
Portable case for ditto 0 5 0

The Economizing Inhaler is constructed so that the gas exhaled from the patient is thoroughly filtered through lime; it then passes through the inhaling tube to the gas-holder, and back again at the next inspiration, thus being filtered a second time.

The gas is thus thoroughly purified from carbonic acid, and from all unhealthy emanations from the lungs, as soon as it passes from the

patient, and before it reaches the inhaling tube. On this account, and for other reasons, it claims superiority over all other apparatus of the kind. At the same time its low price places it within the reach of every operating dentist, whilst more complicated apparatus not only involve a large outlay, but also special instruction in their use.

	£ s. d.

Extract from *Lancet*, August 26th, 1871, p. 295—"There are many advantages in such an instrument. There is little liability of its getting out of repair. The instruments are fitted in various ways, and answer equally well as an Enema or Vaginal Syringe."

Extract from *British Medical Journal*, August 26th, 1871, p. 235—"Messrs. Arnold and Sons, of 35 and 36, West Smithfield, London, have brought out an excellent Enema Syringe, which consists of an India-rubber Bottle fitted with a reversible pipe and mount, to which a cap is arranged, so that the Enema can be carried about full of fluid ready for use."

Extract from *Medical Times and Gazette*, August 19th, 1871, p. 236—"The advantages of such an instrument will at once be seen, as there is no possibility of its getting out of repair. The mounts are made of brass, and carefully tinned on the inner side and every part which comes in contact with the fluid, so as to prevent the possibility of corrosion."

Extract from *Medical Press and Circular*, August 30th, 1871, p. 191—"One of those simple improvements that, when once tried, excite surprise that they were not thought of before, has been made by Messrs. Arnold and Sons in the Elastic Enema Apparatus. We very strongly recommend this instrument, that it is sure to please all who try it."

Sir J. Simpson's Ovum Forceps	0 10 0
Mathieu's cross-action Scissors and Forceps combined	1 10 0
Sponge Forceps for holding sponge	0 5 0
Dr. Greenhalgh's Bilateral Metrotome, with spring stems and Introduce, in morocco case complete, Fig. 391	1 4 0

The advantages of this instrument are - Smallness of uterine extremity; facility of introduction; acts obliquely with exactitude from within outwards; can be accurately adjusted to cut little or much, on one or both sides; blades protected by sheath, so as to avoid injury to the vaginal walls; can be used without the speculum or exposure; when duly regulated no risk of haemorrhage.

Sir J. Simpson's Metrotome	1 4 0
Sims' ditto	2 2 0
Mathieu's ditto	2 12 6
Routh's ditto	2 2 0
Avcling's ditto	1 7 6
Dr. (Greenhalgh's) Metrometer Sound, for measuring any part of the cavity of the uterus in its long axis, or from side to side, or back to front, Fig. 392	2 2 0

This instrument consists of a caluna traversed by a moveable shaft, at one extremity of which are two probe-pointed watch-springs, at the other a graduated scale, indicating, when liberated by a screw, the amount of divergence taking place within the cavity of the uterus, and hence its dimensions.

Sims' Uterine Sound	0 10 6
Sir J. Simpson's Uterine Sound	0 6 6
Ditto ditto jointed for por- tability	0 9 6

FIG. 393.

£	s.	d.
Dr. Greenhalgh's Pelvimeter, for giving exactitude to the finger in admeasurements of the pelvis, Fig. 393 . . .	2	2
		0

This instrument consists of a band of flexible metal, the extremities of which are connected by india-rubber webbing: can be firmly adjusted to my hand. To its upper extremity is attached a crutch, to fix the index finger, while at the lower end is a graduated scale and moveable button. From the centre of the band is a shaft, which can be fixed by a catch, moveable from before backwards and from above downwards, which can be regulated at the scale.

Dr. Greenhalgh's Spongio-piline and air or water Vaginal Plugs, three sizes the set complete	1	1	0
---	---	---	---

Possess facility of introduction and removal, accurate and comfortable adaptability.

Speculums. See pages 57, 127, 128, 129, 130.

FIG. 394.

£ s. d.

Dr. Greenhalgh's Improved perforated and tapering Sea
Tangle Tents, long and short, Fig. 394. . . per doz. 0 7 0

Possess the following advantages:—Facility of introduction, rapidity of expansion, softness, drain for uterine secretions.

Solid Laminaria Tents	per doz.	0	4	0
Sims' Sponge Tents	ditto	0	3	6
Ditto Arnold and Sons' improved, perforated, very superior	per doz.	0	5	0

Dr. Greenhalgh's Jointed Galvanic self-retaining perforated
Intra Uterine Stems each 0 7 6

Secure facility of introduction, adaptability to the movements
of the uterus, free escape of the uterine secretions, little liability to
slip.

Sir J. Simpson's Galvanic Stems	0	5	6	
Perforated Sponge Tents, coated with wax	per doz.	0	5	0

FIG. 395.

Dr. Godson's Sponge and Laminaria Tent Introducer,

Fig. 395, with 3 jointed points	1	1	0
Ditto ditto with 1 pointed end	0	15	0

Extract from *Lancet*, April 22nd, 1871:—"The novelty of this instrument consists in the point intended for the reception of the tent being connected to the stilette by means of a screw, which permits of rotation, and of a small hinge-joint immediately above the screw, which gives a free lateral movement. The combination of these two contrivances confers on the point and the tent attached to it all the range of movement of a ball and socket joint, and enables the tent to find its way easily and without violence through the cervix. It possesses an additional advantage of permitting the introduction to be made without the aid of a speculum."

Sims' Sponge Tent Forceps	0	15	0
-------------------------------------	---	----	---

FIG. 396.

	£ s. d.
Dr. Greenhalgh's Expanding and Self-retaining Tut vulcanite and metallic, Intra-uterine Stems, Fig. 396	r, 0 4 0

Possess the following advantages:—Ease of introduction, allow the secretions of the cavity of the uterus to pass through, not liable to slip out, by pressure against the cut surfaces after division of the cervix uteri, prevent haemorrhage, can be retained for any period; incorrosive, and avoid the necessity for local dressings.

Introducer for ditto	0 3 6
Ditto plated, in ivory handle	0 6 0
Dr. Greenhalgh's perforated Vulcanite Stems, 6 sizes . each	0 3 0

FIG. 417

Mr. Cattlin's Apparatus for above, Fig. 417 0 15 0

Extract from Mr. Cattlin's report in Vol. III, No. 6, of Odontological Society —
"A new Portable Battery, invented by Messrs. Arnold and Sons, of West Smithfield. At my suggestion they have adapted a spring with two plates, for the purpose

of instantly conveying a galvanic current to any part of the human body, in case of suspended animation, under the use of anaesthetics. . . . I have tried the effect of this instrument upon the lower animals, and have found its action to be very perfect."

The great superiority of this battery consists in the little trouble required to put it in action, and the immense power obtained. Sulphuric acid one part to seven of water.

A set of six Smee's One Pint Batteries, in mahogany tray, arranged for quantity and intensity	.	2	10	0

Daniel's Constant Battery

Consists of a cylindrical copper vessel, in which is placed a porous earthen tube, containing a rod of zinc amalgamated with mercury. Sulphuric acid one part to ten of water, which is to be put into the porous tube, and a saturated solution of sulphate of copper into the copper vessel.

			£ s. d.

MICROSCOPES AND APPARATUS.

No. 1.—A neat and convenient Microscope, having a joint to incline the instrument to any angle.—Rack adjustment to body, revolving Diaphragm, solid bronzed Stand, $\frac{1}{2}$ and 1-inch Object Glass, Live Box, and Dissecting Forceps. Complete in cabinet, with four objects, lock and key 2 2 0

FIG. 427

No. 2.—Arnold and Sons' Portable Microscope, Fig. 427. This Microscope is very portable and substantial in its construction, inclines to any angle, with rackwork adjustment for focussing, working up on a triangular bar of gunmetal. At tached to the stand is a condenser, with universal joints for opaque objects, a Water Box, Tweezers, and a good 1 and 2-inch combined Object Glass, with Sliding Tubes; the whole complete in a portable case. When the instrument is folded down for packing away, the body slides through the stage, no screwing or unscrewing is necessary, the stand always being intact, with condenser attached. Price complete 3 3 0

Fig. 428.

No. 3.—The "University" Microscope, Fig. 428. This instrument is of great power and definition, and suitable for all purposes of microscopic investigation. The stand is well constructed, firm, and of a new pattern; the stage is circular in form, and the object can be moved in any direction with a smooth, easy motion; the rackwork adjustment for focussing is long, and capable of taking in a 4-inch object glass. It has a fine adjustment; $\frac{1}{4}$ -inch Achromatic Object Glass, forming also $\frac{1}{2}$ -inch and 1-inch, fitted with the Universal Screw; Stand Condenser for opaque objects; Live Box; Stage, and Dissecting Forceps. The whole complete in Mahogany Cabinet.

£ 10 0

No. 4.—A well-constructed Microscope, all brass, made upon the same principle as the more expensive instruments, with coarse and fine adjustments, Draw Tube to body, double Mirror, removing Diaphragm, good $\frac{1}{4}$ -inch Object

	£ s. d.
Glass, ditto 2-inch, No. 1 Eyepiece, Stand Condenser, Live Box, Stage, and Dissecting Forceps. Complete in Cabinet, with half a dozen interesting objects	5 5 0

This instrument is fitted with a large tube in the stage, for the convenience of fitting Polariscopic or any other under illumination, without any after alteration to the Microscope, and any apparatus will fit the same without the necessity of sending the instrument back, being also universal size in the object glass screws.

No. 5.—A very useful Microscope, in construction the same as No. 6, but a size smaller, with object glasses and other extras the same. This is a very complete instrument, there being no unnecessary work or apparatus to make it expensive, the optical and mechanical arrangements being of the most convenient form, but efficient in their performance.

Complete in Cabinet with large drawer	12 12 0
---	---------

No. 6.—A large and substantial Microscope, constructed upon the latest improvements, with coarse and fine adjustment, draw-tube to body, double mechanical stage, with clamping and revolving slider-holder, large double mirror, with every adjustment, diaphragm, &c. This instrument has also the following apparatus:—No. 1 and 2 Eye-pieces, English ; Object Glass, ditto 1 and 2-inch combined, Polarizing Apparatus and Selenite, large Bull's-eye Condenser, on stand, Stage and Dissecting Forceps, Live Box, and Spot Lens. Complete in upright Cabinet, with two large drawers

BURGESS, WILLOWS, & WILLOWS,
 WHOLESALE AND EXPORT DRUGGISTS,
 AND
 MANUFACTURING CHEMISTS,

101, HIGH HOLBORN, LONDON, W.C.

By Special Appointment to the Royal Veterinary College,
LONDON.

Price Lists of Drugs, Chemicals, and Pharmaceutical preparations on application. Orders received direct, or through Messrs. ARNOLD and SONS.

**OSBORNE, BAUER, AND
 CHEESEMAN**

Beg to invite attention to the following specialities.—

Osborne and Company's Cosmetic Petroline Soap, prepared with the pure Barbadoes tar. In addition to the invaluable medicinal qualities this soap possesses, it will be found far superior to other perfumed soaps for the ordinary purposes of the toilet. Its extreme mildness and excellent detergent properties render it an indispensable requisite to all who suffer from tender skin. Sold in Boxes of Three Squares, 1s. per Box.

Osborne and Company's Petroleum Soap is prepared with the same ingredients as the above, but in a more concentrated form for acute cases of skin eruptions, 6d. per Tablet.

Osborne and Company's pure Oatmeal Soap—Juniper Tar Soap—Sulphur Soap—Petroleum Sulphur, 6d. per Tablet.

Osborne and Company's "Baby Soap," specially prepared for the Nursery, 6d. per Tablet.

Osborne and Company's Carbolic Acid and Tar Soap—an invaluable disinfectant, 6d. per Tablet.

 WHOLESALE AND EXPORT PERFUMERS,
 GOLDEN SQUARE REAULT STREET LONDON

DINNEFORD'S HORSE-HAIR FLESH GLOVES, BELTS, BATH BRUSHES, OXFORD AND CAMBRIDGE PADS, &c., &c.

Highly recommended for imparting a natural vigour to the nervous system, for strengthening weak limbs, and for the prevention and relief of Gout and Rheumatism, without risk of injury to the most delicate skin. Manufactured of improved quality, and in various degrees of hardness, by the original Patentees.

DINNEFORD & Co., Pharmaceutical Chemists,
172, New Bond Street, London.

NOTICE. On and after the 1st of January, 1873, ALL BOXES issued by the Proprietors will have the Government Stamp pasted over each box instead of being on the outside wrappers as heretofore; and on each respective box and on the outside wrappers there will be printed the name and the TRADE MARK of the Firm, thus:—

Are WARRANTED not to contain a single particle of MERCURY or any other MINERAL SUBSTANCE, but to consist entirely of Medicinal Matters, PURELY VEGETABLE.

During the last thirty-seven years they have proved their value in thousands of instances in diseases of the Head, Chest, Bowels, Liver, and Kidneys; and in all Skin Complaints are one of the

BEST MEDICINES KNOWN.

Sold in boxes, price 7½d., 1s. 1½d., and 2s. 9d. each, by G. AND SON, 3, Crane Court, Fleet Street, London; and by all Chemists and Medicine Venders all over the world. Sent free on receipt of 8, 14, or 63 stamps, in the United Kingdom.

IMPALPABLE POWDERS OF ALL DRUGS AND CHEMICALS.

Every package branded, and each bottle with trade mark on seal.

Messrs. E., L., & E., and E., S., & Co have carefully selected for quotation in their Monthly Price Current of Drugs, &c., those Drugs and Materia Medica for which their advantageous situation—commanding alike the London, Liverpool, and American markets—enables them to offer to their friends on strikingly favourable terms, and in making these quotations they have considered the need of each class of buyers.

Their uniform custom in the filling of Indents is to ship FIRST qualities of goods, unless otherwise directed or the peculiarities of the market of destination require, and they ship either from London or Liverpool, as may be most convenient or economical to their correspondents in regard to freight, free of expense for land carriage.

Messrs. E., L., & E., or E., S., & Co. will forward their price-current regularly per monthly mail on receipt of application to that effect.

LAMPLough's PYRETIC SALINE

Is found pre-eminently beneficial in preventing and curing **SMALL-POX**, by Purifying, Invigorating, and Vitalizing the Blood. Any person who has already this complaint should take it, and be kept in a cool and darkened room to prevent its leaving any trace on the features.

Sickness, Headache, and Nausea, are in most cases immediately relieved by taking a teaspoonful in a tumbler of cold water. This can be repeated once or twice in two hours if needful.

Sea Voyages—It is a very valuable accompaniment, and should on no account be omitted, it instantly allays the sea or bilious sickness.

For Bilious Constitution, giving rise to vitiated Secretions, Indigestion, and Eruptions of the Skin, a teaspoonful should be taken daily with the dinner, in a tumbler of water, and the same quantity on going to bed.

"RAWUL PINDEE, PUNJAB, INDIA, 28th March, 1871.

"On the recommendation of several officers, who had some of your saline in the West Indies, all of whom speak in the highest terms of your Pyretic Saline, we were induced to try it for the first time in this Province. After use in the fever-stricken districts by which we are surrounded, we firmly believe that your Pyretic Saline will do more to prevent fever than all the Quinine ever imported can cure. We write thus strongly because both from personal experience and observation we believe we have at length found a remedy against the ever present fever of these parts, which cost the British nation hundreds of valuable lives in Peshawur alone. We are now willing to enter into special terms for large and continued supplies, &c."

May be obtained of the Proprietor,

H. LAMPLough, Consulting Chemist, 113, Holborn, E.C.
(Second door from Hatton Garden), and of all respectable Chemists.

In Bottles, 2s. 6d., 4s. 6d., 11s., and 21s.

THE MEDICAL PRESS AND CIRCULAR.

VOLUME LXVI. THIRTY-THIRD YEAR OF PUBLICATION.

This is one of the oldest and most influential of the medical journals of Great Britain. It is thoroughly impartial, and is the only one which equally represents the Schools of Medicine and Surgery in England, Ireland, and Scotland.

The translations of the most interesting medical and scientific writings from all European languages is also a special feature of this Journal.

The reduction of Subscription to 20s. per annum post free, paid in advance, renders it the *cheapest* weekly Medical Journal. It is published every Wednesday; is the only one with cut edges, and is thoroughly practical, alike to the Physician, the Surgeon, and General Practitioner.

Subscriptions for America and Canada may be paid to our recognised Agents, or direct by International Post Office order £1 6s. per annum post free (about 6 $\frac{1}{2}$ dollars). P.O.O. to be made payable to A.A. Tindall at the London Office.

London:

BAILLIERE, TINDALL, AND COX,
English and Foreign Medical and Scientific Publishers,
KING WILLIAM STREET, STRAND.
(PARIS & MADRID.)

THE MEDICAL TIMES AND GAZETTE

Has now for forty-two years maintained a high reputation as an independant weekly journal, devoted to the advancement and promulgation of the science and literature of medicine, and to the furtherance of the social and professional interests of medical practitioners. In the fullest sense of the phrase it claims to represent the whole Profession. It is the tool of no party, however influential; the organ of no Association, however powerful. Subservient to no private ends, it is the echo of no restricted circle, the automaton of no class interest. Its object is to reflect honestly and truly the medical opinion of the day; to give its readers the earliest information as to the advances of Medical, Surgical, and Obstetrical Science and Art, and to afford the thinkers, workers, and observers in the profession the means of laying the results of their labours before the medical world at home and abroad. Its contributors, as will be apparent on reference to its past volumes and to the appended list, are amongst the foremost in the vanguard of medical science, and it possesses, on the Continents of Europe and America, in India and the Colonies, a staff of correspondents, on whom it can rely for all information of professional value. In inviting a continuance of the support which the Profession has hitherto so freely accorded to it, the Management of the MEDICAL TIMES AND GAZETTE can point proudly and confidently to its long career of professional independence, fairness and usefulness.

Each number of the MEDICAL TIMES AND GAZETTE contains one or more Original Lectures, Original Communications, Reports of the Practice at the London and Provincial Hospitals, Notes and Queries, Editorial Articles, Reviews, Biographical Notices, Selections from Foreign Journals, Letters from Correspondents in various parts of the Globe, full Information respecting the Army and Navy Services, Reports of Medical Societies, Returns of Meteorology and Vital Statistics, Notices of the newest applications of Sanitary Science, new Medicines, Articles of Diet and Medical Invention and Apparatus, the earliest and most interesting Medical News, and Correspondence on all Medical Topics, punctual answers being given to all questions of interest to the Profession.

The following Gentlemen are among the contributors for the year 1872.

- JAMES ANDREW, M.D. Oxon., F.R.C.P., Physician to St. Bartholomew's Hospital. (*Clinical Lectures.*)
 T. H. BARTLETT, M.B. Lond., F.R.C.S., Surgeon to the General Hospital, Birmingham. (*Clinical Lectures on Surgical Dressings.*)
 W. R. BASHAM, M.D. Edin., F.R.C.P., Physician to the Westminster Hospital
 W. H. BROADHURST, M.D. Lond., F.R.C.P., Physician to St. Mary's Hospital, &c (1 *Clinical Lecture on a Cure of Profuse Hæmorrhage; Clinical Contributions on Nervous and other Diseases.*)
 JOHN BEDDOE, M.D. Edin., M.R.C.P., Physician to the Bristol Royal Infirmary. (*On Civilization and Disease.*)
 J. S. BRISTOWE, M.D. Lond., F.R.C.P., Physician to St. Thomas's Hospital. (*Clinical Lectures.*)
 THOMAS BRYANT, F.R.C.S., Surgeon to Guy's Hospital. (*Clinical Lectures.*)
 F. A. BULLEY, F.R.C.S. (Hon.), Consulting-Surgeon Royal Berks Hospital, Reading. (*Papers on Medical and Surgical Subjects.*)
 C. BULSTEIN, F.R.C.S., Surgeon to Royal Albert Hospital, Devonport.
 G. W. CALDWELL, F.R.C.S., Surgeon to St. Bartholomew's Hospital. (*Notes on Surgical Cases.*)
 W. CHOLMELEY, M.D., F.R.C.P., Physician to the Great Northern Hospital. (*Clinical Cases.*)
 E. CLAPTON, M.D. Lond., F.R.C.P., F.R.C.S., Physician to St. Thomas's Hospital.
 F. LE GROS CLARK, F.R.C.S., Senior Surgeon to St. Thomas's Hospital. (*Cases in Surgery with Clinical Remarks.*)

CHLORODYNE,

DR J COLLIS BROWNE'S
SPECIAL NOTICE

The absurd statements that have recently appeared in Medical and other Journals respecting the constituents of CHLORODYNE (such analysis differing widely), J. T. DAVENPORT is compelled to further caution the Profession against using any Compound under the name of Chlorodyne but the genuine, which alone has gained such extraordinary celebrity.

J. T. DAVENPORT appends Medical Testimony in confirmation of the above. The wonderful efficacy of Chlorodyne being universally acknowledged, it must be evident to all that the assumption of the name to any other Compound than the genuine is not only dishonest in obtaining name, under false pretences, but still more unprincipled by injuring the health of the Patient and casting discredit to the Physician. Even death has resulted from the use of spurious Chlorodyne when benefit had been previously experienced from the genuine, and the melancholy circumstance has no effect in restraining these hitherto proclive persons.

From Dr J Wilson, Castleton, Yorkshire.
I regret to use a considerable quantity of Chlorodyne in cases where no other medicine is of the least avail, and my object in wishing a supply from your own establishment is that I am frequently deceived by getting a spurious article from other places, although I never order anything but the genuine Browne's Chlorodyne.

From J. Atkin, M.D., Medical Officer, Fever Hospital, Oldcastle, Co Meath.
Having ordered from Mr. Duggie's Chlorodyne, I was not only dissatisfied with its effects but annoyed when I received a spirituous compound. I have been in the habit of using your Chlorodyne with great advantage to my patients and satisfaction to myself.

VICE-CHANCELLOR SIR W P WOOD stated.—Dr J Collis Browne "was undoubtedly the Inventor of Chlorodyne." "I believe the whole story of the Defendant Freeman to be deliberately untrue, as the falsehood he has disposed to with regard to the use of his Chlorodyne in the Hospital."

Sold in Bottles at 1s 1d, 2s 9d, and 4s 6d Sole Manufacturer,

THE BRITISH MEDICAL JOURNAL FOR 1872

Has already contained Dr. Bristowe's Croonian Lectures at the Royal College of Physicians; Dr. Habershaw's Lettsonian Lectures at the Medical Society of London; part of a series of Lectures on the Practice of Medicine, by Dr. Murchison, F.R.S.; a series of Clinical Lectures by Sir James Paget, Bart., F.R.S.; and Lectures by Drs. Aitken (Netley), Ferrier, Fuller, George Johnson, Latham (Cambridge), Playfair, Protheroe Smith, and Stokes (Dublin), and Messrs. Annandale (Edinburgh), Callender, De Morgan, Erichsen, Prescott, Howett, Spencer Smith, W. Stokes (Dublin), John Wood, &c.

COURSES OF LECTURES by Sir W. Jenner, Bart., F.R.S.; Sir William O. Gull, Bart., F.R.S.; Drs. Fraser (Edinburgh), Humphrey, Morell Mackenzie, and others, will appear in the forthcoming volumes.

Among the more important papers which have appeared during 1872 are communications from Sir James Alderson, Sir W. Gull, Bart.; Drs. Clifford Allbutt (Leeds), Ford Anderson, Athill (Dublin), Aveling, Bastian, Broadbent, Brunton, Christie (Zanzibar), Lockhart, Clarke, Clouston (Carlisle), Gairdner (Glasgow), Grimshaw (Dublin), Haughton (Dublin), Heaton (Leeds), Braxton Hicks, Holmes, Hughlings, Jackson, Mariet, Maudsley, Morton (Glasgow), Moxon, Douglas Powell, Russell, Reynolds, Seegen (Vienna), Shapter (Exeter), Stromeyer (Hanover), Waters (Liverpool), Wilks, Wolfe (Glasgow); and Messrs. H. Arnott, Le Gros Clarke, Dalrymple, M.P.; Gascoyn, Ernest Hart, Hairland, Berkeley Hill, Jonathan Hutchinson, Funckes Jordan (Birmingham), Rivington, &c.

SPECIAL REPORTS have appeared in the Journal on the Purification of Drinking Waters, on the action of Various Filters, and on the Milk supplied to Hospitals.

NOW PUBLISHING: Reports on Sanitary Appliances, Drainage and Sanitary Engineering of Houses, Hospitals, and Asylums; Professor Humphrey's Lectures on Human Myology, at the Royal College of Surgeons, &c.

BRITISH MEDICAL JOURNAL,

Edited by ERNEST HART, Esq.,

Is the most powerful medium of medical opinion, and is by far the most widely circulated. It is the organ of the British Medical Association which numbers nearly 5,000 members in the United Kingdom, Ireland and the Colonies, and is yearly increasing. They are a most influential class, a large proportion of them holding public appointments.

The Journal is taken by nearly every hospital surgeon and physician, poor law medical officer, and public health officer, in the Kingdom, in garrison libraries, public offices, clubs and most reading-rooms.

It has a department devoted to the description, with figures of new inventions in medicine, surgery, chemistry, dietetics, microscopy, hygiene, and the arts allied to medicine.

The British Medical Journal takes rank as the leading medical journal, and from its wide circulation among the most influential classes is a highly valuable medium for advertisers.

Price 5d.; yearly subscription, £1 l.

New Patent Safety Self-Registering Clinical Thermometer

Has an arrangement which prevents the possibility of its being put out of order by the index or register being lost in the bulb, and is guaranteed not to become disarranged by any amount of violence, whether in the hands of the physician or most inexperienced person.

The instructions for use are the same as accompany his other registering medical thermometers, except that no care whatever to prevent disarrangement is required.

The sizes are 1 and 6 inches respectively, in neat lined pocket case. Silver or ivory cases if required.

For rough usage, taking or sending abroad, or leaving to be used by the patient, the value of the Patent Safety Thermometer cannot be over-estimated. Price 2s. 6d. each extra.

The Improved Portable Spirometer, in neat mahogany case, $6\frac{1}{2} \times 3\frac{3}{4}$ inches, is just completed. £1 10s.

Medical Coils and Electro-Galvanic Machines, with all the latest improvements.

THE DOCTOR:

A MONTHLY REVIEW OF BRITISH AND FOREIGN MEDICAL PRACTICE AND LITERATURE.

The object of THE DOCTOR is to present, in the smallest possible compass, an Epitome of the Practice and Literature of the profession at home and abroad.

THE DOCTOR does not rival other Journals. Rather it supplements their usefulness by analysing, condensing, and criticising their most important contents, and so serving as an Index to British and Foreign Medical Science and Practice.

THE DOCTOR is the natural medium of intercommunication between the medical profession and the educated public.

The Doctor has been described as—

“The pith of the periodicals at home and abroad.”

“The best epitome of Medical literature extant.”

“The public opinion of the Medical Profession.”

“A boon to every practitioner, as ‘it contains in a few well-arranged pages all that is necessary to keep any one *au courant* with the progress of Medical science and literature.’”

“A complete review of Medical practice and literature in all countries.”

The DOCTOR, therefore, does not rival other journals, but is the natural Supplement to each, and its low price places it within the reach of every Medical man.

The circulation of the DOCTOR during the year 1871 equalled that of any of the Medical weeklies, and every new number brings new subscribers. The DOCTOR has been mentioned with approval, and its articles are regularly quoted by the leading journals of Europe and America.

Post-office orders or cheques to be made payable to Baillière, Tindall, and Cox, 20 King William street, Strand, London, W.C. Where it is difficult to obtain a Post office order, postage stamps (HALF-PENNY ones preferred) may be sent. No form of subscription is necessary, an ordinary visiting card or name and address on paper, enclosed with the amount of subscription, will secure the regular transmission of the Doctor as soon as published. The Subscription for the year is 6s. Post Free in the United Kingdom.

In America, France, Belgium, Algiers, Australia, and whenever the postage is one penny the subscription is 7s.; India, Spain, Germany, and where the postage is two-pence the subscription is 8s.; Italy, and where the postage is threepence, 9s.

Now Ready, price 3s. 6d., cloth.

LIQUEURS...The following are the best imported, and are all Foreign.
CURACOA, MARASCHINO, NOYAU..... 9s. per Bottle.

A Full List of Liqueurs can be had on application.

NOTES AND REMARKS.

CASES, if not returned to us, are charged at 2s. per dozen. We cannot be answerable for cases returned if the original direction cards are removed or defaced. The railway charge must be prepaid on all "RETURNS," or the cases are now not sent forward by the railway companies.

BOTTLES. We allow for our own Bottles (with C. W. S, in punt) 1s. per dozen, and 6d. per dozen for ordinary bottles, which are useless to us, as we do not bottle in them.

PACKAGES. *Stone bottles*, covered with basket work, are charged at 1s. 6d a Gallon.—7 Gall. Drums and Cases, 10s. Adamas tap, 1s. 6d.—Qr. Casks, 10s. If any of these packages are returned to be re-filled no charge is made, and when finally returned (in good order) we allow 1s. 3d. per gallon for the stone bottles, 8s. 4d. for drum and case, and 8s. 4d. for a Quarter Cask.

CARRIAGE. We pay carriage to any railway station in England *on even a single dozen*. If charged a second time by the railway officials, on receipt of the carriage note we will recover and remit the amount.

SAVORY AND MOORE'S SPECIAL PREPARATIONS

and Appliances in aid of Medicine and Surgery.

EUCALYPTUS GLOBULUS, or Fever Tree. Preparations—Tincture, Fluid Extract, Solid Extract, Powder, and Essential Oil.

"Employed with success in Intermittent Fever, Bronchitis, Asthma, &c., and strongly recommended as a Tonic and Stimulant."—*Vid. THE LANCET*, April 20th, 1872, page 557.

LACTO-PHOSPHATE OF LIME. } WINE and SYRUP.
LACTO-PHOSPHATE OF IRON. }

N.B.—The Syrups are more concentrated than Dr. Dusart's, and the patient consequently takes *considerably less sugar* in a dose.

GENUINE PANCREATIC EMULSION, as originally prepared by them, and the only kind recognised by the Medical Profession.

THE BEST FOOD FOR INFANTS. Used in the Nurseries of the Royal Families of England and Russia.

PURE PANCREATINE effects the digestion and assimilation of Cod-liver Oil and fatty substances generally.

PANCREATINE POWDER, PILLS, and WINE, and PANCREATIC COCOA.
